

Project Design Phase-II
Data Flow Diagram & User Stories

Date	28 June 2025
Team ID	LTVIP2025MID58662
Project Name	Learnhub:Your Center For Skill Enhancement
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example:

LEARNHB: YOUR CENTRE FOR SKILL ENHANCEMENT

```
graph TD; A[LEARNHB: YOUR CENTRE FOR SKILL ENHANCEMENT] --> B[Registration/Login]; B --> C[Browse Courses]; C --> D[Enroll in Course]; D --> E[Access Learning Content]; E --> F[Take Assessments];
```

The diagram is a vertical flowchart on a light gray background. It starts with a title in a rounded rectangle, followed by six rectangular boxes connected by downward-pointing arrows. The steps are: Registration/Login, Browse Courses, Enroll in Course, Access Learning Content, and Take Assessments. A line extends from the bottom of the last box.

Registration/Login

Browse Courses

Enroll in Course

Access Learning
Content

Take Assessments

User Stories

Use the below template to list all the user stories for the product.
